CONTENTS

10 ***Historical metallurgy*** **United Steel Companies Ltd** C. Bodsworth

17 **Modelling steel demand in the UK** M. Evans

25 **Statistical methodology applied to prediction of mechanical properties of niobium microalloyed steels produced at Clabecq Steel Plant** Ph. Lehert, Ch. Dumortier, and P. Donfut

31 **Gas distribution in granular zone of blast furnace: room temperature studies** B. D. Pandey, P. K. Sen, and A. Chatterjee

40 **Refining of steel to remove nitrogen using fluxes with high nitride capacities** Yu. I. Utochkin, A. V. Pavlov, and M. G. Hocking

46 ***Technical note*** **Stresses in continuous solidifying slab: mathematical model** S. E. Royzman

---

'Modelling of metal rolling processes 7: Cooling in rolling mills'

51 **Editorial**

52 **Heat transfer conditions in roll gap in hot strip rolling** J. D. Fletcher and J. H. Beynon

58 **Evaluation of interfacial heat transfer and its effects on hot forming processes** Y. H. Li and C. M. Sellars

62 ***Extended abstract*** **Thermal camber model Thebo** W. Sauer

66 ***Extended abstract*** **Practical method to calculate effects of work roll cooling on strip shape and crown** G. Schipper

69 **Control of thermal camber by spray cooling when hot rolling aluminium** P. A. Atack, S. Connelly, and I. S. Robinson

74 ***Extended abstract*** **On line modelling and control of strip cooling** W. J. Lawrence, A. F. MacAlister, and P. J. Reeve

79 ***Extended abstract*** **Physically based cooling line model to meet growing demands in temperature and flexibility** L. Henrich, R. Holz, and G. Kneppe

82 ***Extended abstract*** **Evolution of transversal thermal profile on hot strip mill** J. M. Collet-Fenetrier, P. Gevers, B. de Lamberterie, F. Blanchet, and P. Caut

84 ***Extended abstract*** **Recent development in process optimisation for laminar cooling in hot strip mills** D. Auzinger

88 **Numerical simulation of transient cooling of hot rolled asymmetrical ship profile (Holland profile)** V. Olden, A. Småbrekke, and M. Raudenský

92 ***Extended abstract*** **Method of measuring heat transfer between rotating roll and cooling spray** C. J. Davenport

---

102 ***IoM Annual Dinner*** **Changes in technology underpinning the competitiveness of business** B. S. Moffat

---

1st Annual Seminar of the EPSRC Engineering Doctorate Centre – Wales

129 **Editorial**

130 **Modelling flow stress evolution during elevated temperature deformation of two low carbon steels** J. G. Anderson and R. W. Evans

136 **Heat development in resistance seam welding of mild steel using continuous current** D. R. Attorre, J. D. Parker, and N. T. Williams

150 **Effect of number of welds in spot welded and weldbonded arrays on static failure load of individual spot welds and adhesive bond** D. R. Hills, J. D. Parker, and N. T. Williams

157 **Prediction of electrode campaign life when spot welding zinc coated steels incorporating electrode tip dressing operations** R. J. Holliday, J. D. Parker, and N. T. Williams

164 **Kinetics of pickling of low carbon steel** B. J. Goode, R. D. Jones, and J. N. H. Howells

171 **Interactions between liquid zinc and bath hardware materials in continuous galvanising lines** M. S. Brunnock, R. D. Jones, G. A. Jenkins, and D. T. Llewellyn

177 **Influence of weld orientation on forming limit diagram of similar/dissimilar thickness laser welded joints** P. J. Scriven, J. A. Brandon, and N. T. Williams

183 **Scanning reference electrode technique as tool for investigating localised corrosion phenomena in galvanised steels** H. N. McMurray, S. R. Magill, and B. D. Jeffs

---

195 ***Company feature*** **Heckett MultiServ enhances quality at Teesside** L. Ahlemeyer

228 **Application of Mould Thermal Monitoring to Avesta Sheffield's SMACC slab caster** J. D. Madill

235 **Development of quantitative methodology for assessing embodied energy of recyclable and reusable materials/products** A. Amato, L. Brimacombe, and N. Howard

242 **Scrap, recycling, and steel production: a general perspective and Turkey's standpoint** S. Aydin, Y. Taptik, and C. Arslan

247 **Kinetics of nitrogen reaction in iron melts with C, Cr, Si, Mn, Ti, V, or Al and in some steel melts** W. P. Wu and D. Janke

255 **Tundish steel melt dynamics with and without flow modifiers through physical modelling** S. Singh and S. C. Koria

264 **Productivity and quality enhancement at the LTV Cleveland East No. 1 continuous caster – 12 years of continuous improvement** H. D. Baker

267 **Numerical prediction of magnetohydrodynamic flow in continuous casting process** T. Ishii, S. S. Sazhin, and M. Makhlouf

289 ***Company profile*** **History of USX Corp.** E. T. Turkdogan

293 ***Regional survey*** **The steel industry in India** by A. Chatterjee and R. Singh

309 **The forces that drive research and development in the steel industry** J. C. van den Berg

317 **Accumulated energy consumption and emissions of CO_2, SO_2, and NO_x during life cycle of stainless steel** N. Caspersen

324 **Modelling the inner state of the blast furnace: the Thybas models** W. Kowalski, H. J. Bachhofen, and K. Kreibich

328 **Kinetics of reduction of FeO in $CaO–SiO_2–FeO$ slags Part 1: Reduction by solute carbon** R. K. Paramguru, H. S. Ray, and P. Basu

335 **Cold model study of mixing and mass transfer in LD converters at Tata Steel** S. K. Ajmani and A. Chatterjee

346 **Simple semiempirical model for prediction of austenite decomposition and related heat release during cooling of low alloyed steels** J. Miettinen

357 **Experimental determination of velocity flow fields in continuous hot dip galvanising baths** P. Toussaint, P. Vernin, B. Symoens, L. Segers, M. Tolley, R. Winand, and M. Dubois

361 ***Technical note*** **Cold model study of slag entrainment into liquid steel in continuous slab caster** D. Gupta and A. K. Lahiri

388 ***Regional survey*** **The status of the US steel industry – 1996** J. Stubbles

397 **Vanadium in steels** D. T. Llewellyn

406 **Mathematical model for energy saving in induration of iron ore pellets** F. Chejne Janna, J. C. Ruiz Sierra and J. M. Badie

411 **Kinetics of reduction of FeO in $CaO–SiO_2–FeO$ slags Part 2: Reduction by solid carbon** R. K. Paramguru, H. S. Ray, P. Basu, and A. K. Jouhari

416 **Accretion growth on shrouded tuyeres** A. K. Kyllo and G. G. Richards

425 **Numerical analysis of effect of electromagnetic stirring on solidification phenomena in continuous casting** S. I. Chung and J. K. Yoon

433 **Prediction of martensite start temperature using artificial neural networks** W. G. Vermeulen, P. F. Morris, A. P. de Weijer, and S. van der Zwaag

438 **Methodology for designing impingement air jet coolers for continuous annealing of steel strip** W. D. Morris and J. O. Medwell

446 ***Technical note*** **Steel scrap melting by means of converter–electric arc furnace process: prospects for Croatia** M. Kundak

456 ***Profile*** **IRSID in Usinor Sacilor**

457 ***Profile*** **Process metallurgy at TU Clausthal** K.-H. Spitzer and F. Ahrenhold

466 ***Historical metallurgy*** **Richard Thomas and Baldwins Ltd** C. Bodsworth

471 ***Review*** **Dual phase steels** D. T. Llewellyn and D. J. Hillis

479 **Kinetics of low temperature reduction of hematite to magnetite** J. Janowski and A. Sadowski

486 **Recovery of potential thermal energy of rolling mill waste oil through sintering** A. Cores, A. Formoso, M. Sirgado, J. L. Verduras, and L. Calleja

493 **Flowrate sensor for pulverised coal injection into blast furnace** Shin Byoung-Chul

497 **Column reactor: a new desulphurising facility** C. Borgianni, P. Granati, and M. I. Pistelli

504 **Improvement of inner quality in continuously cast billets through thermal soft reduction and use of multivariate analysis of saved process variables** P. Sivesson, T. Örtlund, and B. Widell

512 **On line monitoring of mould–shell interaction during continuous casting of steel billets** S. Chandra, I. V. Samarasekera, J. K. Brimacombe, I. A. Bakshi, and B. N. Walker

522 **On line measuring method for mould friction in continuous casting** M. Yao and D. C. Fang
